If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

Response to Amendment

1. This Office Action is in response to Amendment filed on date: 10/14/2009.
Claims 1-8, 10-19 and 21-25 are still pending.
Claims 9, 20 and 26-41 have been cancelled.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 26-41 directed to inventions non-elected without traverse. Accordingly, claims 26-41 have been cancelled (see MPEP paragraph 08-07).

Reasons for Allowance

3. Claims 1-8, 10-19 and 21-25 are allowed.

The following is a statement of reason for the indication of allowance:

Independent claims 1, 10, 15, 19, 22 and 23 have been amended to include limitations from cancelled dependent claim 9, which were indicated as allowable subject matter in the previous Office Action mailed 08/21/2004 (page 16).

The updated search found:

Umesh discloses that "the base station 1 changes the antenna weight so as to expand a width of the directional beam pattern when the up signal interval (τ) exceeds the timer threshold, and further changes the width of the directional beam pattern by changing the antenna weight according to the antenna weight optimization algorithm if the base station 1 receives the up signal while the directional beam pattern is being expanded" (see specification for more details).

Asanuma discloses that "the value of the phase shift of the orthogonal codes between multiple channels is sensed at the base station BS1 and timing control information corresponding to the value is notified to the mobile stations PS1 to PS3 and that each of the mobile stations PS1 to PS3 controls the transmission timing of the up-link channel signal on the basis of the notified timing control information" (see specification for more details).

However, the combination of each of the cited references above does not disclose nor fairly suggest the each and every claimed limitation of independent claims, therefore claims 1-8, 10-19 and 21-25 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
